HIGH-IMPACT RESULTS

- Prepared information, proof of compliance statistics, and details for senior management's use during calls with government auditors. Provided real-time online support to assist management team in answering auditor questions during each call.
- Used advanced Excel techniques (filters, pivot tables, macros, VBA, and lookup tables) to reduce a weekly effort of 30-40 hours, into a 30-minute process for consolidation of information from six engineering systems.

Home Lab Experience

SERVERS

- Administrate 70 systems, both Linux (Ubuntu, CentOS, and RHEL) and Windows Server 2019 providing services and access to my home lab through credentialed VPN access.
- Centralized Auditing of all systems through Security Onion suite with monthly audits of all systems, including syslog Analysis.
- Created and managed a cross platform Windows/Linux Fileshare and AAA server, simplifying logins for my family and ensuring only authorized people can access specific services.
- Applied Group Policy Objects on all Windows endpoints ensuring consistency in experience for all local users.
- Installed managed switch, segmenting network and setting priority for primary devices with lower priority being set for less needed services.
- Used containers in a Type 1 Hypervisor to minimize resource usage for deployment of 50 crypto-mines, decreasing resource consumption to approximately 25% of what virtual machines required.
- Created, deployed, documented, and trained a non-technical user to deploy crypto mines, successfully completing the task without further supervision.
- Generated hardened templates for all local commonly deployed operating systems, using Security Technical Implementation Guides (STIG) as the baseline.

PROFESSIONAL EXPERIENCE

Spark Power – 4900 Diplomacy Rd, Fort Worth TX 76155

2023-Present

Analyst

2024-Present

- Created Python programs to generate daily reports, automatically identifying underperformances and dispatching operators to investigate and determine the cause.
- Generate and present monthly and Quarterly reports for internal and external customers.
- Interpret raw data coming from over 300 solar sites, detecting issues with production from string outages, tracking, underperformance or weather-related issues.

Renewable Power Operator

2023-2024

- Consolidated 13 proprietary interfaces into unified presentation of site information and performance. Identifying issues with shifting inputs and implementing solutions to prevent further manual maintenance.
- Generated daily production reports for several sites, comparing estimated to actual

production, including analysis for underperformance that was sent to the asset manager and customer.

- Clearly and concisely communicate with federal regulators, informing of production limitations and energy curtailment restraints.

Gateway Church – 1101 N. Carroll Ave, Southlake TX 76092

Site Security Manager/Senior Security Officer

2019-Present

- Monitored surveillance system for ten sites, documenting calls for service, incident reports, liaison with appropriate emergency services, and coordinating ground team at each site as necessary.
- Conduct monthly risk assessments for multiple events with up to 2,000 guests in attendance and facilitate interdepartmental communication to align church-wide teams.
- Created employee training guide for Access Control systems emphasizing principle of least access. Guide included training on process for coding employee access badges to disarm security alarms across ten sites and to update/remove access for employees recently transitioning roles or terminated.

Thrivent Financial – 101 Bourland Rd, Keller, TX 76248

Financial Planner

2018-2019

- Led clients through personal financial analysis designed to prioritize their needs/wants and determine their current financial position, resulting in identification of steps needed to align with their desires.
- Built client specific investment strategies and assisted clients with building budgets.

Triumph Aerostructures – 1401 Nolan Ryan Expy, Arlington, TX 76011

Engineering Aide

2016-2018

- Managed team of five interns, growing their skill in the Microsoft suite and standardizing processes and reports to allow quick handoff and development of presentations.
- Generated resource loaded schedules using MS Project for 14 engineering/production programs by WBS, allowing the Test Lab to increase efficiency.

Wells Fargo – 250 E John Carpenter Freeway, Irving, TX 75062

Mortgage Loan Processor

2015-2016

Bank of America – 4200 Amon Carter Boulevard, Fort Worth, TX 76155

Project Manager/ Operations Consultant

2010-2015

2013-2015

- Major contributor to successful rollout of largest system launch in Underwriting Department history.
- Facilitated training for existing underwriting personnel at regional locations regarding new government regulations and compliance procedures. Each site achieved and maintained 95 percent quality rating after training.
- Hosted weekly calls with Underwriting senior management to review escalated issues and propose/implement solutions.
- Consolidated team inputs and authored MS Power Point presentation to executive team, resulting in simplification of underwriter's role and restructuring of daily activities nationwide.

Mortgage Underwriter

2011-2013

- Assigned to special project team to underwrite aged files, ensuring that each borrower was assisted in a timely manner.
- Within first three months of joining underwriting team, became the "go-to" team member for questions regarding underwriting guidelines and policy for income calculations.
- Calculated income on loan modification applications and performed final document check according to government guidelines to ensure all government requirements were met.
